XGT
40V Li-ion max **BL** MOTOR **XPT**

BL MOTOR
BL motor for faster polishing

Protect the workpiece

Elastomer bumpers protect the workpiece from damage, positioned in all positions most likely to hit car body

XPT eXtreme Protection Technology

advanced protection against dust and moisture for high durability and prolonged use in worksite environments

Easy to grip head shape

enables user to easily press the pad to the car body in applications such as scratch removal with polishing compound

3-Position loop handle

Variable Speed Control by dial with indication of max rotation speed

Max rotation speed can be selected to suit application from 600 - 2,200min⁻¹

Constant Speed Control

minimizes the reduction in pad speed to provide stable polishing

Anti-restart function

prevents accidental startup

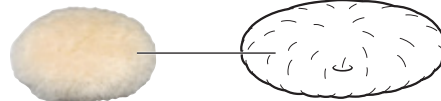

Soft start feature

which suppresses the start-up reaction for smoother start-ups and longer gear life
